Subject: Golden Dragon Bond Release Concurrence
To: Jerry Mansfield <jmansfield@utah.gov>

Hi Jerry,

Here is the inspection report for the Golden Dragon small mine. The operator indicated that they were not successful in finding gold and decided to close their permit and apply for bond release. The ML no. is: ML-51888 and the location is the SE 1/4 of the NE 1/4 of T6S R21E.

I am also attaching some photos from last year (March 2015) when they appeared to be active and digging shallow test pits. I did not get too many good photos this year, but I can assure you all these areas now have vegetation growing in nicely along the floodplain.

The operator is requesting a full release of their bond of \$19,800. Please let me know if I have your concurrence.

April
